JORDAN RIVERA

SOC Analyst

City, State | (555) 555-0123 | jordan.rivera@example.com | linkedin.com/in/yourname | github.com/yourname

PROFESSIONAL SUMMARY

IT professional moving into security operations, with hands-on experience supporting users, managing accounts, and investigating suspicious activity. Uses SIEM and log data to spot anomalies, documents every step clearly, and explains technical issues in plain language. Builds home labs to practice detection, identity security, and incident response.

CORE TECHNICAL SKILLS

Security Monitoring: Splunk, Microsoft Sentinel, alert triage, log analysis, KQL and SPL searches
Incident Response: phishing investigation, escalation, ticket documentation, shift handoffs
Identity & Access Management: Active Directory, Entra ID, MFA, account provisioning, access reviews
Networking & Systems: TCP/IP, DNS, DHCP, VPNs, firewalls, Windows and Linux
Tools: ServiceNow, Wireshark, PowerShell, Microsoft 365

CERTIFICATIONS

CompTIA Security+ | CompTIA Network+ | Google Cybersecurity Certificate

PROFESSIONAL EXPERIENCE

IT Support Specialist | *Regional Healthcare Clinic, City, State* Month 20XX to Present

- Resolve hardware, software, and account issues for staff across several clinic locations, prioritizing tickets by impact and urgency.
- Create, update, and disable user accounts in Active Directory and Microsoft 365 as staff join, change roles, or leave.
- Review suspicious emails reported by staff, flag phishing attempts, and escalate confirmed threats to the security team.
- Document fixes and common issues in the team knowledge base so recurring problems are solved faster.

Help Desk Technician | *Retail Company, City, State* Month 20XX to Month 20XX

- Answered phone, chat, and email requests from store employees and solved most issues on first contact.
- Reset passwords and unlocked accounts while verifying identity to prevent unauthorized access.
- Set up and configured laptops, printers, and point-of-sale devices for new store openings.

Customer Service Associate | *Retail Company, City, State* Month 20XX to Month 20XX

- Protected customer payment information by following store security and privacy procedures.
- Spotted and reported gift card and refund scams, helping reduce losses at the register.

HOME LAB PROJECTS

Splunk SIEM Home Lab | *Splunk, Windows, Sysmon* Month 20XX

- Forwarded Windows event and Sysmon logs into Splunk and built searches to detect failed logins and new admin accounts.
- Simulated a brute force attack, investigated the alerts, and wrote an incident report with a timeline and next steps.

Active Directory Home Lab | *Windows Server, Active Directory, PowerShell* Month 20XX

- Built a Windows Server domain with test users and groups, and used PowerShell to automate account creation.
- Applied Group Policy for password rules and account lockout to practice least privilege and access control.

EDUCATION

B.S. Information Technology | *University Name* Month 20XX
